Registrations open for the fourth Solar Together scheme

Swindon residents have another chance to take part in a solar panel group-buying scheme run by Swindon Borough Council in partnership with Wiltshire Council and independent group-buying specialist, iChoosr.

Now in its fourth year, Solar Together Wiltshire has seen more than 600 Swindon households get quality solar panels and battery storage installed at a competitive price. The scheme brings residents together to increase their bargaining power and secure the most competitive offer through a reverse auction with pre-vetted installers.

Register your interest for free on the [Solar Together website](#) by 8 August, with no obligation to continue further. Also read the [answers to commons questions](#) to consider if installing solar panels is right for you.

Partners outline new priorities to make Swindon safer

Tackling domestic abuse, disrupting organised crime and improving safety within the night-time economy are some of the priorities local agencies in Swindon will focus on over the next three years.

The priorities form part of a new strategy launched by Swindon's Community Safety Partnership (CSP), which sets out a clear vision for tackling crime, reducing anti-social behaviour (ASB) and supporting vulnerable residents within the Borough. [Read more about the strategy.](#)
