Ref: Exciting new energy project – Little Rose Lane Energy Park

Dear Stakeholder,

I'm reaching out on behalf of **Rivan Industries** to introduce our ambitious plans for **Little Rose Lane Energy Park** - a groundbreaking renewable energy project planned for development right here in Swindon.

Pioneering Clean Energy for Heavy Industry

At Rivan Industries, our mission is simple: **eliminate the 12 gigatonnes of carbon dioxide (CO₂) being emitted by heavy industries every year**. We're making it cheaper to create clean, synthetic fuels from the air than to extract polluting fossil fuels from the ground.

The **Little Rose Lane Energy Park** will be **the UK's first commercial-scale renewable natural gas (RNG) facility** - a bold step towards a fossil-free future. Located north of Blunsdon and southeast of Cricklade, this site will combine solar energy with innovative carbon capture technology to produce **clean, cost-effective fuels for industries that can't otherwise be electrified**.

Why This Matters

Decarbonising electricity is well underway, but many industries - **aviation, shipping, steel, cement, and chemicals** - still need energy-dense fuels or hydrocarbons to function. **This is where Rivan's RNG generators come in**. Using renewable energy, our technology captures CO₂ from the air and combines it with green hydrogen (H₂) to produce a direct replacement for natural gas - one that can **immediately integrate into the UK's energy system** and cut carbon emissions from hard-to-abate sectors.

A Homegrown Breakthrough for Swindon

We're especially proud to bring this innovation to **Swindon**, where Rivan has been developing and testing its technology at the Science and Innovation Park near Wroughton. With strong local support, we've secured planning permission for a **test facility**, and construction is set to begin soon. This milestone marks the first step in demonstrating how our technology can deliver real, scalable emissions reductions.

We see Swindon as a key partner in our journey and are keen to align our growth with the region's **economic and decarbonisation strategies**.

RIVAN

Next Steps – Let's Connect

Once our test facility is operational, we'd love to invite you to **see first-hand how Rivan is solving some of the biggest challenges in clean energy**. In the meantime, we'd be delighted to meet with you to discuss:

- Our plans for **Little Rose Lane Energy Park**
- The **operation of our test facility**
- How Rivan's **investment in Swindon** can drive local economic and environmental benefits

To arrange a meeting, simply email littleroselane@rivan.com with your availability, and we'll set up a time that works for you.

Over the next few months, we'll be engaging extensively with the local community and stakeholders, with formal public consultation launching in the spring. If you have any questions in the meantime, please don't hesitate to get in touch using the details below.

We look forward to working together to make Swindon a leader in the **future of sustainable energy**.

Best regards,
Harvey Hodd
CEO, Rivan Industries
